Title: **Beyond the Manikin: Reimagining Simulation in Nursing Education**
Description: Simulation in nursing education extends far beyond the manikin. This session will invite participants to reimagine the possibilities of simulation, exploring creative and innovative approaches that spark curiosity, engage learners, and create meaningful learning experiences across the nursing curriculum.

Here are the objectives for Beyond the Manikin: Reimagining Simulation in Nursing Education
By the end of the session, participants will be able to:
1. Describe how historical developments in simulation reflect enduring principles of practice, feedback, reflection, and learner engagement.
2. Reframe decisions about simulation around intended learning outcomes and learner development rather than clinical-hour replacement.
3. Identify opportunities to apply simulation methodology within theory, clinical, and post-clinical learning.
